

ATHARV DANGE

DevOps Engineer

G-mail: atharvdange70@gmail.com | +91 7620096806 | [Linkedln](#) | [GitHub](#) | [Portfolio](#) | Pune, India

PROFESSIONAL SUMMARY

Entry-level DevOps Engineer with hands-on experience in AWS infrastructure provisioning, CI/CD automation, containerization, and cloud deployments using AWS, Docker, Kubernetes, Terraform, Jenkins, and GitHub Actions. Experienced in building highly available applications, automating infrastructure with Infrastructure as Code (IaC), and managing Linux-based cloud environments through internship and real-world projects. Strong problem-solving, communication, collaboration, and analytical skills with a passion for learning and implementing modern cloud and DevOps technologies.

EXPERIENCE

DevOps Engineer Hisan Labs Private Limited, Pune <i>Cloud & DevOps Division</i>	Oct 2025 – June 2026 (9 Months)
▶ Worked on CI/CD pipelines and Jenkins workflows to automate application builds and deployments, using Git, Docker, Kubernetes, and AWS across development environments. ▶ Built and managed Docker-based application environments using Dockerfiles and Docker Compose for consistent application setup and deployment. ▶ Used Kubernetes resources such as Deployments, Services, and ConfigMaps to deploy and manage containerized application ▶ Managed source code with Git and worked in Linux environments for application configuration, scripting, troubleshooting, and deployment tasks. ▶ Configured and maintained AWS services including EC2, S3, EBS, IAM, VPC, CloudFront, Route 53, RDS, Elastic Load Balancing, Auto Scaling, Lambda, EventBridge, and CloudWatch to build and manage cloud infrastructure. ▶ Automated AWS infrastructure provisioning with Terraform and Infrastructure as Code, making deployments consistent, repeatable, and easier to maintain. ▶ Monitored AWS resources and application environments using CloudWatch, checking logs, metrics, and alerts to identify and troubleshoot deployment or infrastructure issues..	

TECHNICAL SKILLS

Cloud: AWS (EC2, VPC, S3, EBS, CloudFront, Route 53, IAM, Lambda) Google Cloud Platform (GCP) Microsoft Azure
CI/CD Tools: Jenkins, GitHub Actions, Gitlab
Containerization: Docker, Docker Compose, Docker Hub
Orchestration: Kubernetes (K8s), Helm, kubectl
Infrastructure as Code: Terraform, AWS CloudFormation
Version Control: Git, GitHub, Gitlab, Bitbucket
Monitoring: Amazon CloudWatch, Prometheus, Grafana, Datadog
Scripting: Bash, Shell Scripting, Python
Operating Systems: Linux (Ubuntu, CentOS, Amazon Linux) Window Server
Database: MySQL, PostgreSQL, MongoDB,
Tools: VS Code, Cursor, Linux Terminal, Docker Desktop, Jira
AI Tools: ChatGPT, GitHub Copilot

DEVOPS PROJECTS

Project 1: AWS Three-Tier Web Application
Tech Stack: AWS EC2, VPC, S3, CloudFront, RDS (MySQL), IAM, Security Groups.
▶ Designed and deployed a secure three-tier web application on AWS using EC2, S3, CloudFront, and RDS. ▶ Hosted the frontend on Amazon S3 with CloudFront and deployed the backend application on EC2. ▶ Configured Amazon RDS for MySQL and secured the infrastructure using VPC, IAM, and Security Groups. ▶ Tested end-to-end connectivity between the frontend, backend, and database to ensure reliable application communication. ▶ Improved AWS resources and application settings to make the application faster, more reliable, and efficient.

Project 2: Edublitz Medical B2B ERP System

Tech Stack: AWS EKS, Kubernetes, Docker, Terraform, Jenkins, AWS ALB, CloudFront, S3, Route53, Trivy, SonarCloud, MongoDB Atlas.

- Designed and deployed the AWS infrastructure for a containerized B2B ERP application using EKS, ALB, CloudFront, S3, and Route53.
- Containerized application microservices with Docker and deployed them on Amazon EKS using Kubernetes for scalable and reliable workloads.
- Provisioned and managed AWS resources using modular Terraform, following Infrastructure as Code (IaC) practices.
- Developed Jenkins CI/CD pipelines to automate application builds, Docker image creation, security checks, and Kubernetes deployments.
- Added Docker security scanning and SonarCloud to the Jenkins CI/CD pipeline to identify security issues and maintain code quality.

CERTIFICATION

- AWS Certified Cloud Practitioner - Amazon Web Service, 2026
- Simplilearn Certified Introduction of Kubernetes, 2026

EDUCATION

Bachelor of Computer Application – Computer Fundamental

Rashtrasant Tukadoji Maharaj University, Nagpur

Graduated 2022 - 2025

LANGUAGES

English (Professional Working Proficiency) | Hindi (Native) | Marathi (Native)
